

Dear Colleagues,

At Foodbalt 2026, we do not expect traditional posters – no printing, no carrying poster trying not to leave in on the plane, bus or train, no pinning to the wall, no consideration what to do with it after conference. Instead, we are organizing pitch sessions, which will allow everybody to introduce his/her topic and draw attention of the audience to important issues solved in your research. Keep in mind the aim to disseminate your results and findings, to discuss them with colleagues working in the same field.

For your Pitch presentation please prepare one slide, which will visually support your 3 minute talk.

Here are some tips.

Please plan carefully, what you are going to tell to explain your research idea and results, keeping in mind time limit – 3 minutes! Respect others and do not plan for a longer talk.

Select widescreen slide size (16:9), once it is ready send it to liene.ozola@lbtu.lv. Deadline May 11, 2026. No corrections will be accepted after the deadline. It is like with poster presentation, once printed you do not change it anymore.

For visualisation use traditional graphs, photos, infographics etc.

Do not write a lot of text on the slide. You will be there to explain!

For the title of your presentation please use at least Calibri 36 pt letters or other font of similar size. For the body text please use 20 pt letters.

Keep in mind that e-abstract book with all abstracts submitted and contact information will be available for each conference participant. So, if further questions arise it will be possible to contact you.
